

A.D.I.O.S.™

Selective Herbicide Control for Broadleaf and Grassy Weeds

Description

- Post emergence foliar herbicide for the control of broadleaf weeds.
- **A.D.I.O.S.™** is non-toxic and odorless selective weed killer
- Can be safely used on turf & lawn or around ornamental plants, bushes, small trees, fruits and vegetables gardens.
- No buffer zone required when applied next to drinkable fresh water wells or wetlands.
- All natural, **A.D.I.O.S.™** is totally safe to be used around children and pets.

Mode of action

Once sprayed on the aerial parts of the weed, **A.D.I.O.S.™** travels immediately through the foliage, stems and finally, all the way down to the roots.

This systemic reaction provides a **rapid desiccation** of the weed due to rapid loss of water from the plant cells.

Visible signs of control may be seen **shortly** after the application.

One application is typically required to achieve results.

All products are **PMRA** registered and is classified as a minimum risk pesticide.

Efficacy

A.D.I.O.S.™ effectively controls broadleaf and grassy weeds including:

| | | |
|--|--------------------|----------------------|
| Carpet weed | Chickweed | Clovers |
| Henbit | Knotweed | Lambsquarters |
